based on different codes and regulations

(IMDG / OACI / RID et ADR / ADN / AEIA / RTMDR / DOT

UN Recommendation

Individual product stamping with a distinguishing label

The logo  certifies the carriage of the packaged product in the EC as well as for export

Manufacturer duties

- Follow up of the statement conformity
- Half-yearly destructive tests for all statements (watertightness, hydrostatic pressure, overthrow)
- Destructive tests for the seaming control of every new production (as indicated in the AQ manual)
- Traceability of the materials and constituents, to be archived for 2 years
- Acceptance of a control from the certificatory laboratory (laboratory under the Transportation Ministry trusteeship)
- Consultancy on the most adapted economical solutions

User responsibilities

The user has to:

- **Provide some information on the product:**

- nature
- Packing Group (X, Y or Z)
- density
- packaged mass
- viscosity

- **Indicate if possible:**

- filling process
- storage conditions
- carriage conditions
